

The idea is simple: the best home for an at-risk homeowner is the home they already have.

NEW CONSTRUCTION

When using volunteers, the average affordable housing home costs **\$120,000** to build.

For the same investment, Rebuild Upstate can repair and rehabilitate **20 existing homes**.

HOME PRESERVATION

MEET THE WRIGHT FAMILY

Mrs. Wright is blind and relies on memory to get around her home. Her husband was once her eyes, but a significant cancer diagnosis leaves him less able to help. Volunteers repaired the home so it remains a place where they can both age in place without concern of injury. After volunteers built a ramp, Mrs. Wright was able to feel her beloved oak tree in the backyard for the first time in five years.

HOLISTIC APPROACH

We are part of the solution to make sure our community's affordable housing needs are met - but we are not the only solution. In some cases, our neighbors must have a new house or a rental unit available. Rebuild Upstate specifically engages with community partners and volunteers to **provide critical home repairs for low-income homeowners in Upstate South Carolina**.
